

# Mirkwood Designs Presents Tiny Cube Template

*(Thanks to Barbara for the inspiration!)*

This 1¼-inch cube box is perfect to showcase tiny rubber stamps and embellishments! Print it out on card stock (heavy stock is best) and stamp each square with your favorite tiny stamps. Add beads to the bottom for feet, and a bead (or ribbon) in the center of the top for a handle.

You can glue all of the tabs for a box that is permanently closed, or leave the tabs for the top unglued so you can hide tiny treasures inside.

1. Print the template on sturdy card stock.
2. Cut on solid lines, score on dotted lines.
3. Embellish each square as desired.
4. Fold box and glue tabs.
5. Add beads if desired (as described above).

➤ **Note: The printed template should measure exactly 6 x 4.75 inches. Make sure that when printing, Page Scaling is set to NONE.**
